Sir:

**PRELIMINARY AMENDMENT**

In order to place the above-identified application in better condition for examination,  
please amend the application as follows:

**IN THE CLAIMS**

Please substitute the following amended claims 1-14 for corresponding claims 1-14.  
A copy of the amended claims showing current revisions is attached.

1. {AMENDED} A receiver for a high speed transmission system for receiving a first  
signal (B) over a transmission path, said first signal (B) comprising a plurality of data  
symbols which are successively transmitted, in front of each being a first prefix for avoiding  
an interference between said successively transmitted data symbols, said receiver  
comprising:

- means for generating a second a second prefix for each first prefix in front of each  
of said plurality of data symbols; and
- replacing means for replacing said first prefix by said second prefix, said second  
prefix respectively having a length longer than that of said first prefix to be replaced,  
characterized by
